SUMMARY

4th-year DevOps Engineering apprentice at Tiria, a French tech company developing internal software for the food-processing industry (production, quality and customer management). Seeking a 9-week internship abroad starting June 2027.

SKILLS

DevOps
- Kubernetes
- OpenTofu/Terraform
- Docker/Podman
- GitLab and GitHub CI/CD
- Grafana/Prometheus

Programming & Frameworks
- TypeScript / React
- Rust
- Svelte
- PHP
- Python
- Java

OS & Tools
- Linux: NixOS, Debian, Ubuntu
- Excalidraw

SOFT SKILLS

- Teamwork
- Patience
- Adaptability
- Problem-solving

LANGUAGES

French	Native
English	Advanced
Spanish	Basic

HOBBIES

Numismatics
Collection of 216 coins from many countries, mostly euro coins

Genealogy
Researched and built my family tree of 90 people, going back to 1865

Music & Vinyl Records
Collection of records that I listen to, especially by Linkin Park

Traveling to explore nature
Exploring new places and hiking in forests

VOLUNTEERING

Basketball Referee
SAM Basket Lesparre | Sep. 2016 - Aug. 2021
Refereed home games of younger age categories

Available upon request.

EXPERIENCE

DevOps Engineer Apprentice — Sep. 2025 - Present
Tiria, a software provider for the food industry — L'Isle-Jourdain, France
- Working with clients to design and build the best possible product, in terms of both architecture and usability.
- Developing and deploying web-based applications with our in-house framework, and mobile applications with Flutter.
- Containerizing applications with Docker and setting up CI pipelines
- Taking part in the early stages of several projects.

Web Developer Apprentice — Apr. 2024 - Jul. 2025
Tiria, a software provider for the food industry — L'Isle-Jourdain, France
- Built web applications with an in-house framework written in PHP.

Intern — Dec. 2018
CompuGroup Medical France — Soulac-sur-Mer, France
- Discovered life in a company and built games such as Mastermind and Hangman in C# with 2 other students.

EDUCATION

3rd and 4th years of a 5-year Cloud DevOps Engineering Degree — Oct. 2025 - Present
Polytech — Montpellier, France
- Apprenticeship-based program specialized in DevOps engineering: creating, deploying, managing and monitoring applications.
- Equivalent to an M.Eng. (Master of Engineering).

(Expected graduation: 2028)

3-Year University Degree in Computer Science — Sep. 2022 - Jul. 2025
University Institute of Technology (IUT) of Bordeaux — Gradignan, France
- Apprenticeship-based program specialized in software development.
- Learned the fundamentals of computer science: programming, software design and deployment.

PROJECTS

Personal Homelab — 2026 - Present
K3s, Kubernetes, Hardware, ZFS, Docker, Grafana, Uptime Kuma — louis-michault.fr/projects/homelab
- Built my personal homelab with components from my old computer.
- Installed and maintain a K3s Kubernetes cluster with two 4 TB HDDs mirrored using ZFS.
- Self-host many services I use every day, such as Immich (photos), Excalidraw (diagrams), Penpot (Figma alternative) and Jellyfin (digital copies of my vinyl records).
- Currently adding a Raspberry Pi at a second location for multi-site redundancy.

Omni — 2025 - Present
TypeScript, React, Kubernetes — louis-michault.fr/projects/omni
- School project with 15 other students to build a collaborative suite similar to Proton or Google Workspace, which we aim to make open source.
- Self-hostable and sovereign.
- Working on web apps, GitLab CI/CD and Kubernetes.
- A centralized authentication system, a drive, a password manager, a video conferencing tool and an admin panel to manage the suite.
